- Windows XP/Vista/7
- Mac OS X and above
- iPhone and iPad OS 6.and above
- Android 2.3 and above
- Linux 64-bit clients – Support for Ubuntu, CentOS, redhat, fedora, Mint, OpenSUSE, Mageia and elementary OS linux distributions.

1.0 WINDOWS XP/VISTA/7/8

To install **Amadeo Windows** client in a desktop computer use the following procedure:

1. Download the Windows Amadeo client from <http://amadeocloud.com/download.php>.
2. Run the installer and follow the on screen instructions.
3. Once installed, run the program and enter valid credentials.

Sign-in credentials are provided to you by email when your Amadeo user is added to the system. In case you haven't received this email please contact your Amadeo system administrator inside of your organization.

2.0 MAC OS X AND ABOVE

To install **Amadeo Mac OS** client in a desktop computer use the following procedure:

1. Download the Mac Amadeo client from <http://amadeocloud.com/download.php>.
2. Extract the downloaded file.
3. Open the extracted folder and locate the **Amadeo application**.
4. Move this file to your Mac's Application Folder.
5. Open the file you just moved. In case you receive an error message, open the application and press the ctrl key at the same time, then click OK in the prompt window.
6. Once the client is running (sign in window is open), enter valid sign in credentials.

Sign-in credentials are provided to you by email when your Amadeo user is added to the system. In case you haven't received this email please contact your Amadeo system administrator inside of your organization.

3.0 LINUX

To install any of the supported linux distributions **Amadeo** clients in a desktop computer use the following procedure:

1. Download the Linux Amadeo client from <http://amadeocloud.com/download.php>.
2. Extract the downloaded file.
3. Open the extracted folder and locate the **Amadeo application**.
4. Move this file to your Linux Application Folder, or any other destination as needed.
5. This file is the program file. Just open it to run Amadeo application.
6. Once the client is running (sign in window is open), enter valid sign in credentials.

Sign-in credentials are provided to you by email when your Amadeo user is added to the system. In case you haven't received this email please contact your Amadeo system administrator inside of your organization.
